### Projects

- Outrun Brewing Co <http://www.outrunbrewingco.com>
  - Outrun Brewing Co is a new nano brewery coming to Stone Mountain in 2019. Their website is a simple React front end but is set up for a full MERN stack so the brewers can save their drinks and display as needed. Front End only -- [danielpruitt.github.io/OutrunBrewingCo](https://danielpruitt.github.io/OutrunBrewingCo)
- Family Christmas App [ourfamilychristmas.herokuapp.com/](http://ourfamilychristmas.herokuapp.com/)
  - This small application was built with the MERN stack in order for my family to list gifts and mark off what was purchased for others.
- Trial of Anima- <https://trialofanima.herokuapp.com/>
  - Trial of Anima is a Full Stack MERN application that is a simple game that utilizes React states to manipulate the DOM for gameplay. Mongo and Express are used to store the usernames and how many times the user cleared the game.
- NYT React - <https://immense-earth-26245.herokuapp.com/>
  - The NYT React web app is a Full Stack MERN application that allows the user to search the New York Times Api for articles within a parameter of years and can save articles for later reading.

---
